

# Asset Risk Assessment Report

Date Generated: May 8, 2026

Executive Summary: This report identifies the top high risk assets based on age, condition, failure risk, and replacement cost. Assets with higher risk scores should be prioritized for inspection, maintenance planning, and capital investment review.

## Top 10 High Risk Assets:

| Asset ID  | Asset Name                | Condition | Age | Replacement Cost | Failure Risk | Risk Score |
|-----------|---------------------------|-----------|-----|------------------|--------------|------------|
| JWF02-ATL | Passenger Boarding Bridge | Poor      | 25  | \$2,300,000      | High         | 50         |
| JWF08-ATL | Passenger Boarding Bridge | Poor      | 20  | \$2,300,000      | Low          | 41         |
| JWF04-ATL | Passenger Boarding Bridge | Good      | 14  | \$2,300,000      | High         | 39         |
| JWC37-ATL | Passenger Boarding Bridge | Fair      | 12  | \$2,300,000      | Medium       | 39         |
| JWC33-ATL | Passenger Boarding Bridge | Good      | 14  | \$2,300,000      | Medium       | 35         |
| JWF10-ATL | Passenger Boarding Bridge | Good      | 15  | \$2,300,000      | Low          | 32         |
| ACF08-ATL | Preconditioned Air        | Poor      | 12  | \$425,000        | High         | 28         |
| ACE32-ATL | Preconditioned Air        | Poor      | 10  | \$425,000        | High         | 27         |
| ACF12-ATL | Preconditioned Air        | Poor      | 12  | \$425,000        | Medium       | 24         |
| ACE30-ATL | Preconditioned Air        | Fair      | 10  | \$425,000        | High         | 23         |

Recommendations: Leadership should review the highest-ranked assets first and determine whether they require immediate attention, maintenance, or replacement forecasting, or capital planning consideration.
